

Pond Revive

Creates and supports a healthy environment in which plants and aquatic creatures can thrive

EcoPond Pond Revive is a probiotic for ponds which both stimulates and supplements the naturally occurring micro-organisms present in the pond. It is an eco-friendly way to trigger biological activity and improve the ecosystem of ponds that appear to be lifeless. Regular use throughout the spring and early summer months will help clarify pond water and generate the right environment for aquatic plants and animals to thrive.

Benefits of Pond Revive:

- Revitalises the ecosystem of ponds which appear lifeless
- Encourages healthy growth of aquatic plants and wildlife
- Over time Pond Revive breaks down the tannins which can make water dark
- Clean, simple and easy to use.
- Safe for fish, plants, humans, pets and wildlife.

Dosage: For every 1,000 litres to be treated add 50ml to a bucket of pond water, mix well and spread evenly over the surface. If this is not possible add directly to the pond near to a re-circulating system or pump to ensure it is well mixed but otherwise, it can be simply sprinkled across the surface of the water. Repeat every 5 days for 20 days.

For smaller ponds (less than 1,000 litres) use a minimum dose of 25ml.

A 250 ml bottle will treat up to 2,250 litres of pond water.

Turn off UV lights for 48 hours after dosing.

Additional information:

- Pond Revive does not contain any chemicals.
- Unlike chemical products, natural products such as Eco Pond's Pond Revive can take some time to reach optimum effect but are safer for the user and the environment.
- Using more than the recommended dose causes no harm.

Frequently Asked Questions:

How do I use Ecopond Pond Revive?

We recommend dosing regularly during the spring and early summer months to help generate an environment for a thriving pond and to improve water clarity.

The 250ml, 500ml and 1 litre bottles have built-in measuring chambers. Simply remove the cap on the measuring chamber and gently squeeze the bottle to fill the chamber to the required level.

For best results add the required dose to a bucket of pond water mix well and spread across the surface of the pond. If this is not possible add directly to the pond near to a re-circulating system or pump to ensure it is well mixed but otherwise it can be simply sprinkled across the surface of the water. Repeat every 5 days for 20 days

Pond Revive is a totally natural product, formulated to bring life back to your pond. It may take a few weeks before you see the full effect.

What are the benefits of using Pond Revive?

Pond Revive contains micro-organisms that are usually found in high numbers in healthy ponds. These micro-organisms stimulate other species of bacteria that are essential to nature, and thereby improve your pond's eco-system.

As it is totally natural and safe to use you can be confident that any fish, plants or wildlife will not be affected by it.

Is there anything that stops Ecopond Pond Revive from working?

Pond Revive works well under most conditions, but you may require a higher dose in ponds with high silt content, or in very hard water areas. UV lights will diminish the effectiveness of the product.

Is there a situation where it cannot be used?

No, it is safe to use in even the most sensitive environments.

What happens if I add more than the recommended dose?

Don't worry. It is a totally natural product and no harm can be done by adding too much.
